## EXPERIENCE

### Teaching Assistant

09/2021 - Present

Practical Database - STIKI Malang

Teaching Assistant for "Practical Database 1" and "Practical Database 2" using MySQL

- Post materials provided by campus on E-Learning to be accessed by the students
- Guide the students based on the practical guide textbook provided by the campus
- Help the student that has a problem understanding the lectures
- Giving grades based on their activities and understanding of the lectures also their assignments

### Assistant

03/2019 - Present

Business Incubator Unit - STIKI Malang

- Providing documents required by Business Incubator such as activity reports, invoices, website articles, and half-year reports
- Handling webinars, regularly held monthly (registration, meeting links, host in the meeting room, and certificate)
- Organizing documents for unit's archive
- Maintaining unit's website (post articles and announcements)

### Voice Over Artist

10/2021 - 11/2021

Spageti

Doing voice over for a learning video in English

### Quality Assurance

09/2021 - 11/2021

UTNGL (UT Next Generation Leader) App

This is an LMS (Learning Management System) basis website. This app is used to handle self-development courses. Users could access material and save their progress in the app, also there is a pretest for each section. The administrator could manage the content of the website such as materials and event publications also monitoring the activity and progress of each user.

### Developer

07/2021 - 07/2021

Sobel and Prewitt Edge Detection Application on Images Using MatLab

Develop an image edge detection application that applies Sobel and Prewitt operators using MatLab. This MatLab GUI app has the ability to import an image and applying Sobel and Prewitt to the image uploaded, and then displayed the filtered image. This project is my Digital Image Processing subject final project.

### Developer

06/2021 - 07/2021

Drink Buddy

Develop an application named Drink Buddy. Drink Buddy is an android application to help users stay hydrated by giving reminders to drink. Keep track of users' daily water intake and review their progress. I made this application for my Android Programming subject final project using java and SQLite database. Also, I made the prototype using Figma.

### Developer

04/2021 - 06/2021

Library Administration System

Develop STIKI Library website for Web Programming 2 subject final project using CI. This is an administration dashboard to manage all data in the library, the books and all the transactions, also for reporting.

## Developer

12/2020 - 01/2021

Recreate Website like17subs.com

I recreate this website for my Web Programming 1 subject final project and added some more features. I added features to sign-up to the team, also an administration page to manage the registrant's data. I used PHP native and bootstraps to design the UI.
